

Weekly Report 2016.05.16-2016.05.22

Progress:

1. Huawei Project.

This week I mainly read the document of React.js. React is kind different from the backbone or angular. It mainly provides the function of Views in MVC (Model, View, and Controller). There is a javascript project on Github that supports users to write d3 in react and we are also reading the document of this project to see if we can directly use the code.

2. Patent.

I finished the patent of TCPTree.

3. Review the paper TMNVis.

I have read the paper.

Plan:

1. Huawei Project

Test the performance of React and see if it will be faster in React.
Start to revise the code to React.

2. Patent

Writing patent of my submission in vis.

3. Review the paper TMNVis

Finish the review.
